

# CHARCOAL WIPING PRODUCTS SELECTION GUIDE

## CHARCOAL WIPING PRODUCTS

CONDAT continues to work within the wire industry to provide consistent, high performance & innovative technologies. CONDAT offers charcoal-based products containing special additives, used for the wiping of galvanized wires at the exit of the zinc bath.

The **GALVASMMOOTH** range is designed to offer durable high performance, giving improvements in surface finish and aspect, while at the same time improving workplace safety by suppressing the emission of toxic fumes (often seen by the decomposition of oils used in traditional products).

	Average grain size (mm)		Labelling
GALVASMMOOTH 111	2,4 - 3,0	Large wires and mesh. Heavy zinc deposit.	
GALVASMMOOTH G	1,0 - 1,7	Multipurpose. High life. More environmentally friendly & safer for operators	
GALVASMMOOTH 20/2	1,0 - 2,1	Intermediate diameter. Very bright finish.	
GALVASMMOOTH 153	0,5 - 1,0	Fine wires and mesh. Bright wire processes before cleaning.	
GALVASMMOOTH 153 F	0,4 - 0,8	Very fine wires and mesh.
